DETAILED ACTION

Applicant's amendment and response dated 11/9/07 has been received in application serial number 10/537,713. All comments have been taken into consideration.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection (*based upon the amendment*). It is understood that applicant's invention is designed to be located inside the body to prevent herniation in relation to the intestine as indicated on page 5 of the remarks. Nevertheless the structure *as claimed* is what is being evaluated.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13-14, 21-22 and 28-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Pelissier 6,669,735. Pelissier discloses the invention as claimed noting figure 5-6 comprising: an implant with an outer ring (2) and an inner ring (4) that is arranged in the outer ring about a joint axis, and a number of connecting links (5) extending between the outer ring and the inner ring *wherein the inner ring as an outer diameter and the outer ring as an inside diameter that is larger than the outside diameter of the inner ring*; wherein the connecting links (5) are distributed at a mutual angular distance along a ring and jointly forming a number of openings between the inner ring and outer ring; wherein the material is biocompatible

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pelissier in view of Vadurro et al. 2003/0212461. Pelissier et al. has been disclosed supra however Pelissier does not specify that the implanted to an intestine. . Vadurro et

al. teaches that hernia repair devices may be used where a tube like structure (including muscles and organs) may require repair. It is obvious to one having ordinary skill in the art that the intestine is an organ further it would be obvious to utilize the device of Pelissier applied to the intestine because Pelissier states in col. 2:59-61 that the device is shaped to fit the convexity of viscera (organs) it contains.

Pelissier et al. discloses the claimed invention except for the measurements of the rings. It is an obvious matter of design choice to modify the device of Pelissier et al. in the claimed measures of smaller than 5mm, 4mm and 3mm since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being with the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

Claims 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
